#PositiveImpact

Welcome to Deutsche Bank

More than banking

Located in North Carolina's Research Triangle region, a thriving tech market in the US, Deutsche Bank Cary is the bank's strategic North American Technology Center focused on agile software development, infrastructure support and end user technology.

With a diverse application portfolio and a focus on innovation, you'll have the opportunity to develop world-class software and have a direct impact of the success of our organization and clients.

A look at our office

Deutsche Bank Tech
at a glance

Operating for growth

The future of financial services is technology-driven. Whether you're developing new solutions or improving existing ones, our driving pillars give you the support to have a rewarding and dynamic career.

Innovation

We give our people the freedom to explore new approaches because we aren't reacting to digitalization, we are proactively designing our future.

Agile adoption

Through our agile adoption we're able to respond more quickly to changing needs and deliver high-quality and scalable solution more efficiently.

#EngineerTheFuture

85% of our employees are engineers. Career development doesn't mean losing your technical skills. We offer learning opportunities, tech talks, courses and mentoring.

Discover career opportunities in Technology, Data and Innovation

The Cary Tech Hub has a robust, hands-on engineering culture dedicated to continuous learning, knowledge-sharing, technical skill development and networking. We are an essential part of the bank's technology platform and develop applications for many important business areas.

Corporate Bank Technology

Corporate Banking is a technology-centric business with an increasing move to real-time processing and appetite from customers for integrated systems and access to supporting data. Our Corporate Bank team in Cary plays a critical role providing digitally enabled solutions that meet client demands today and enhance their future business models. The function supports specific businesses areas including, Cash Management (Applications for Payment Initiation, Execution/Liquidity and Surveillance), Trust & Agency Services and Trade Finance & Lending.

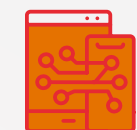

Investment Bank Technology

Our Investment Banking Technology division helps us solve ever-emerging business opportunities with the latest tools and techniques. We use Google Cloud Platform (GCP), Artificial Intelligence (AI), and modern computer languages to develop innovative solutions that enable our clients to make informed investment decisions and generate returns. Our GCP-based platform provides storage, process, and analysis of large data volumes in real-time, with valuable insights into market trends and improved accuracy and efficiency executing trades. AI allows us to develop advanced trading algorithms and predictive models that improve client investment outcomes.

Corporate Functions Technology

Critical to the bank's innovation agenda, our strategic Data Platform delivered via Enterprise Data Services is developed to harmonize data into a 'single source of truth' across the whole bank and drive integration between front-office producers to back-office consumers. The Risk Finance team plays a key role covering Market and Credit Risk, supporting billions of risk measures distributed across the bank on a daily basis. Finance and PACE support CCAR FED reporting along with profit and loss accounting engines.

Chief Technology Office (CTO) Technology

Provides engineering, product management, and testing services for infrastructure systems and applications within the End User Services domain. Products include desktop, print, mobile devices, real time communications, customer services platforms, email, productivity, and collaboration tools

Chief Security Office (CSO)

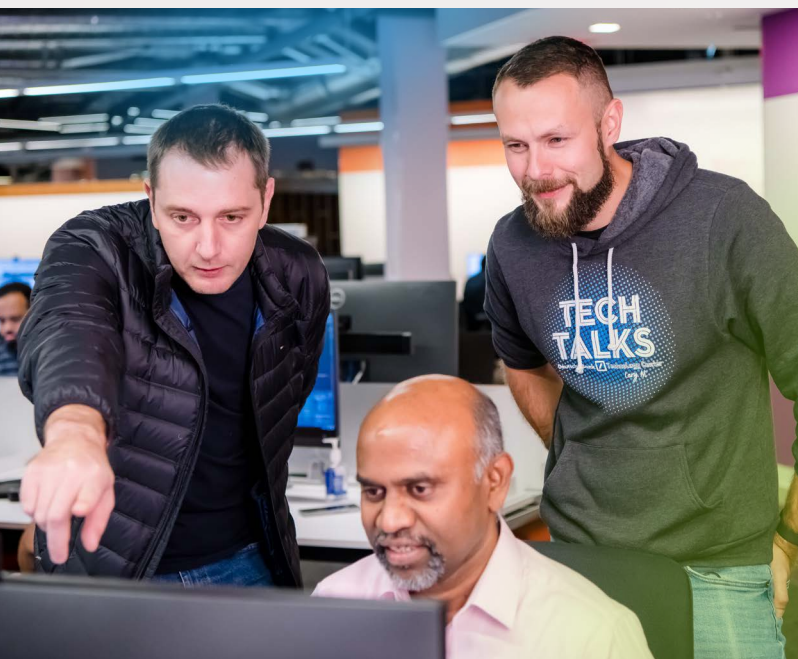

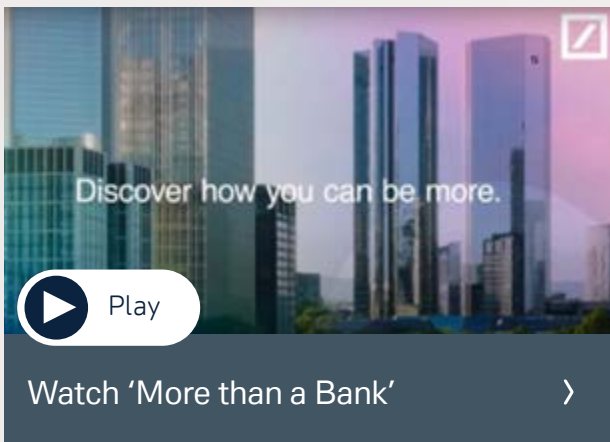

Responsible for the Corporate Security and Information Security for the bank. The Cary teams support Identity and Access and Compliance functions hosting one of the largest internal development teams under CSO.

Beyond impact

From day one, we're thinking about your path to success. We offer a range of benefits that are designed to look after your physical, financial, and emotional well-being. Our hybrid working model gives you the flexibility to balance your career and private life.
